

# INVITATION

## ***AKE spring fairs 2010***

***Augsburg, Nürnberg, Düsseldorf,  
Mailand, ...***

Visit us at all important fairs, showing everything around tools for wood, plastic and metal processing in industry and trade.

# Invitation to the GrindTec 2010

The GrindTec will again be taking place in Augsburg from March 17th to March 20th, 2010. On the occasion of Europe's leading fair for grinding technology AKE will showcase economic tooling solutions for most diverse fields of application.

The blueline tool range of AKE is produced in compliance with proven AKE standards and offers the perfect tool to both craftsmen and ambitious DIY users.

Discover our interesting tool portfolio for different fields of application: soft, hard and exotic wood, aluminium, soft iron, non-ferrous metal, cement fibre boards, plastics and acrylics.

Our team will be pleased to inform you on the occasion of a personal meeting about new items and optimized solutions.

Hall: 5  
Stand: 591

# Invitation to the „Holz-Handwerk 2010“

Machining and processing of the natural material of wood is in the centre of attention at the HOLZ-HANDWERK 2010 (24.03-27.03.2010) in Nuremberg.

At our exhibition stand you will find your individual tooling solution for your fields of application – matching our motto *cutting & better*

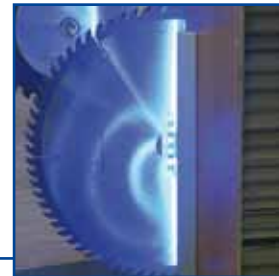

Experience optimization and our innovative tooling solutions at our Stand 10.0-209 in Hall 10.0

## ***Honeycomb thin-kerf sawblade***

For cutting and sizing honeycomb boards with paper core – for better cutting quality.

## ***Set of thin-kerf sawblades with Powerlock interface***

Up to 25 % of costs saved thanks to the reduced kerf with the same rawmaterial input

# Invitation to the TUBE 2010

**WAGNER**  
by AIKIE

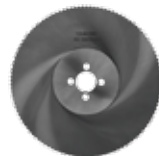

12. - 16. April 2010  
Düsseldorf, Germany  
[www.tube.de](http://www.tube.de)

Being the largest trade fair for tubes worldwide, the TUBE 2010 offers from 12.04.2010 until 16.04.2010 a unique communication platform for exhibitors, decision makers and suppliers likewise.

Experts from all over the world make use of the TUBE as the source of information for the latest developments and tendencies in tube processing and profile processing industries.

Use this opportunity and discover our wide offer of machining technologies for metal processing at our Stand E33 in Hall 6.

Our competent staff members will be pleased to inform you personally about the latest technical developments in the field of carbide-tipped circular sawblades and point out to you the future trends.
